COFFEEMAR G546H CAP BLUETEC	1829x600x597	132kg	230V/1150W	500	5 furniture + sugar + grain bin	4	Configurable
COFFEEMAR G546H CAP BLUETEC GLASS	1829x600x597	140kg	230V/1150W	500	5 furniture + sugar + grain bin	4	Configurable

CHARACTERISTICS

• High adaptability in the selection of your payment system, thanks to the presence of**2 EVA size holes** in the

peripherals section of the machine.

• With the possibility of**master configuration**, with integrated numeric keypad, allowing up to 4 Jofemar satellite machines, to provide a complete and integrated solution for coffee and snack products.

• All variants comply with the**ADA requirement**(Americans with Disabilities Act).

• Stainless steel boiler with improved insulation that allows for a reduction in energy consumption.

• 2 glass size options depending on the dispenser installed (maximum height 117mm).

• Cup detection photocell allows the user to use their own cup instead of getting a cup from the machine.

• Coin payment option thanks to JF8.

• New 4.3'' color graphic display.

• Reduction of noise emission.

• Self-calibration of the flow meter.

• Articulated waste buoy, allowing for better removal and cleaning operations.

• Improved accessibility to the waste area to facilitate removal and cleaning.

DESIGN

New design that allows integration with the V8 Range. With its new graphic display and its elegant design with multiple colors and option to put the Glass front.

• Payment, selection and product delivery systems at an easily accessible height.

• Lighting when inserting and collecting coins.

• Backlit keyboard for low-light environments.

• 36x56mm display label that allows for a more attractive presentation of the products.

• LED lighting in glass collection area.

OPTIONS

• Allows you to dispense coffee without the need for a water supply,

    For this purpose, it carries a water container inside.

• Option to put the G lass front, where the entire surface is covered

    from the machine with glass.

• Support for normal or Rielda locks.

• Option to have a BT11 bill reader or another standard type.

• User validation card reader, such as our J-140.

• Option to put 70mm or 80mm glasses.

• Stirrer dispenser.

• Fresh brew option.

PROGRAMMING

• Data extraction option with J-SUITE using J-LINK

• Display with the possibility of programming the size of texts and images.

• The display microprocessor has more power and memory than previous ranges.

• The control unit is incorporated into the display module, allowing for easy

    updating using the USB port.

• DEX connector as the only solution for extracting accounting and telemetry

    in EVA-DTS format.

• Programming button to access the different menus of the machine.

PRODUCT CONTAINERS

	PRODUCT CONTAINERS	CAPACITY (g)	NUMBER OF SERVICES
